

NEW Quick Peel™

Spray-On, Removable, Protective Coating for Motorsports

"Since spraying Quick Peel on my car 8 months ago, I'm still waiting for it to let me down! It's still on the car, and after 2400 track miles, you would never know that my car had been on the track! The paint looks as good as new, even though it has been pounded by flying tire rubber at 150+ mph!"

—Brian Smith

Spray-On Vehicle Protection

Quick Peel is the first paint protection formula to use spray-on technology. Your paint and decals show through and stay like new. When you're ready, it peels off in large sheets, without a trace.

Quick Peel protects your race vehicle's paint from:

- "Sandblasting" effects from abrasive track debris
- Hot rubber
- Stones, gravel, dirt, sand and grit
- Bugs
- Oil, grease and asphalt

Spray on Quick Peel to protect your vehicle's nose, underhood, wheel tubs, or the entire body. It takes less than a gallon to coat most race vehicles and only one quart to protect most leading edges.

Easier Than Protective Tapes And Films

Quick Peel is the only spray-on, removable coating developed for the serious

racers. It is applied much easier than protective tapes or films. If you can paint, you can apply Quick Peel. Our spray application means no wrinkles and perfect conformance to vehicle contours.

Quick Peel Dries To A Clear, Washable Coating

Quick Peel is a removable, protective clear coat. Decals and numbers show through, paint colors look bright and right. Wash and wax a Quick Peel vehicle like any other – its protection holds up under detergents and hot water, and looks good when you're finished.

Great For Helmets, Pitboxes or Any Painted Surface That Needs Protection

Protect your custom-painted helmets and pit boxes from scratching and chipping with Quick Peel. Quick Peel is excellent for protecting any painted surface. Be creative! Save your painted surfaces!

Race-Proven Durability

Quick Peel products are race-proven at major speedways and hold up under the most grueling race conditions. You can recoat and touch up areas anytime.

Convenient Packaging & Environmentally Friendly

Quick Peel is available in 1-quart or 1-gallon sizes. Coverage varies, but you can protect a good-size vehicle, 2 -3 coats, with a gallon. Quick Peel is water-based, so there are no worries about harming the environment.

Preparation

Clean surface with a wax and grease remover. Be sure to mask surfaces that you do not want to coat. Door edge guard is recommended for break lines. Gravity feed paint gun is recommended. Airless sprayer can be used.

Application & Dry Times

Apply	2 - 3 wet coats
Fluid Tip	1.4 - 2.0 (recommended)
Air Pressure	40 - 50 psi at the gun
Between Coats	15 - 20 minutes
Air Dry	3 hours at 70°F
Force Dry	Unknown

Repair & Recoat

Can be repaired or recoated after 6 hours at 70°F.

Clean-Up

Thoroughly clean gun and equipment with water. Do not use lacquer thinner or gun cleaner, product will gel in gun.

Removal

Any time after 8 hours at 70°F.

More Quality Products from Pro-Tint, Inc.

- Quick Peel Scanning: Used as a liquid wrap. Primer gray in color.
- Clear Spray Peel: Works well on any non-porous surface.
- Peelable Protective Floor Coatings: Easy way to protect your floors.
- 318 Heavy Duty Degreaser: Environmentally-safe, heavy duty cleaner. Dilutable to match the job. Safe on aluminum.
