

# NEW Quick Peel™ Gray

## Gray Liquid Wrap for Motorsports

### The Easy Alternative to “Wrapping”

Quick Peel Gray works well as an alternative to vinyl “wrapping” a car. It can be applied over a ready-to-race car and then painted and decaled. When you are ready to remove it, it peels off in large sheets. The easier, less expensive way to change sponsors or paint schemes versus vinyl wrapping.

### Great Protection for Scanning & Testing

Quick Peel Gray offers all the same protective benefits and performance in an opaque gray color that enables accurate scanning and masks your vehicles during testing.

Quick Peel Gray provides excellent scannability, and removes much more quickly and easily than other current techniques. That’s because all Quick Peel products have been developed exclusively for racing.

Quick Peel Gray’s finish also makes it much harder to analyze photographs of your vehicles on the track. Why give the competition a heads up? Quick Peel Gray keeps security tight on your competitive edge.

## Convenient Packaging & Environmentally Friendly

Quick Peel Gray is available in 1-quart, 1-gallon, or 5-gallon pail sizes. Coverage varies, but you can protect a good-size vehicle, 2 -3 coats, with a gallon. Quick Peel Gray is water-based, so there are no worries about harming the environment.

### Preparation

Clean surface with a wax and grease remover. Be sure to mask surfaces that you do not want to coat. Door edge guard is recommended for break lines. Gravity feed paint gun is recommended. Airless sprayer can be used.

### Application & Dry Times

Apply	2 - 3 wet coats
Fluid Tip	1.4 - 2.0 (recommended)
Air Pressure	40 - 50 psi at the gun
Between Coats	15 - 30 minutes
Air Dry	1 hour at 70°F
Force Dry	Unknown
Dry to Topcoat	1 hour at 70°F

**No sanding is needed prior to topcoat application.**

### Repair & Recoat

Can be repaired or recoated after 1 hour at 70°F.

### Clean-Up

Thoroughly clean gun and equipment with water. Do not use lacquer thinner or gun cleaner, product will gel in gun.

### Removal

Any time after 4 hours at 70°F.

## More Quality Products from Pro-Tint, Inc.

- **Quick Peel:** Professional grade, clear, spray-on protective coating.
- **Clear Spray Peel:** Works well on any non-porous surface.
- **Peelable Protective Floor Coatings:** Easy way to protect your floors.
- **318 Heavy Duty Degreaser:** Environmentally-safe, heavy duty cleaner. Dilutable to match the job. Safe on aluminum.
- **No2 Hand Cleaner:** Non-petroleum based formulation works on hands that are virtually impossible to clean with anything else. Pleasant scent, like cookies, not like oranges or kerosene!
